7

The screenshot shows a Windows Internet Explorer browser window displaying the iCAT website. The address bar shows the URL <http://sites.google.com/site/icd11revision/home>. The page title is "Home (ICD-11 Revision)". The website content includes a navigation menu on the left with items like "Home", "Documents", "Face-to-Face Meetings", "ICAT", "Requirements", "test", "Sitemap", and "WHO". The main content area features a "Home" section with links to "iCAT", "Face-To-Face Mtgs.", "iCamp", "iCamp Task List", "iCamp Visitor Info.", and "iCamp Social Events". A central text block states: "The World Health Organization is undergoing the 11th revision of the International Classification of Diseases! This development of international health information standards is in accordance with its constitution. ICD is one of the main longstanding examples of how health information can assist people and countries in managing their health statistics." Below this, a "Mission:" section describes the goal of producing an international disease classification ready for electronic health records. A list of milestones includes: "ICD-11 alpha draft will be ready by 10 May 2010", "ICD-11 beta draft will be ready by 10 May 2011", and "ICD final draft will be submitted to WHA by 2014". At the bottom, there are links to the website's Facebook page, a blog, Twitter, and YouTube channel. A large graphic on the left side of the page indicates "168 days since ICAMP". The browser's status bar at the bottom shows "Olaf Steinum 10 mars 2010" and "8".

MbRG Mid year meeting

- Valg av hovedtilstand
- Presenting problem versus Underlying cause
- Multiple coding for one condition
- Single codes for multiple conditions
- Reselection rules
- Complications to health care
